

iCheckIt™ ID card decoding for your mobile application

ID Check 2:59 ok

ID INFO

ID #: T230-4217-5702-07
Birth Date: 6/2/75
Expires: 6/2/05

AGE: 29

Name:
TEST, JORDAN A

Address:
108 MAIN ST
SAUK CITY, WI 53583

iCheckIt is a stand-alone ActiveX Control designed to decode magnetic stripe and/or PDF bar code ID cards. **iCheckIt** can be used with virtually any mobile device or PC with a magnetic stripe reader (MSR) and/or 2D bar code reader. This custom control provides decoding capabilities for retail applications (credit/debit), security (ID cards), and driver's license information (DMV and AAMVA). Developers can integrate MSRs into Visual Basic applications with minimal effort.

Advantages

- Dependable decoding for:
 - Credit/debit cards
 - California DMV-format magnetic stripe licenses
 - AAMVA-format magnetic stripe licenses and PDF bar code licenses, permits, and ID cards
 - PDF bar code military ID cards
- Compatible with two- and three-track readers
- Easy migration between device manufacturers
- Can be used with nearly any Windows®-based mobile device or desktop PC
- Compatible with Visual Basic, C++, and other Windows®-based products

How iCheckIt Works

iCheckIt is easy to use and brings endless magnetic card and 2D bar code decoding possibilities to the fingertips of data collection users and developers.

The control automatically parses 2D bar codes scanned with a Microsoft® Windows® CE mobile handheld and accurately decodes magnetic card data through MSRs connected to a Windows CE mobile handheld or a desktop PC.

At design time, developers can easily set up control properties. **iCheckIt** functions include, but are not limited to:

- Decoding swiped or scanned ID card data
- Generating decode events
- Parsing swiped or scanned ID data into individual fields

Minimum Requirements

- Desktop PC with Windows® 98 or above installed
- One of the following tools installed on the desktop PC:
 - eMbedded Visual Tools (eVB, eVC++)
 - Visual Studio 6.0
- **iCheckIt** ActiveX Control installed on your desktop PC or mobile handheld (Windows® CE 4.0 or later)
- Compatible magnetic stripe reader and/or 2D bar code scanner
