iSwipeIt is an ActiveX Control designed for use with magnetic stripe accessories connected to Microsoft® Windows® CE mobile devices from Symbol Technologies or a desktop PC. **iSwipeIt** accurately decodes magnetic card data for retail applications (credit/debit), security (ID cards), and drivers' license information (DMV and AAMVA).

Advantages

iSwipeIt is easy to use and brings endless magnetic card decoding possibilities to the fingertips of data collection users and developers:

- Compatible with 2- and 3-track readers, ARM, MIPS, and X-Scale architectures
- Easy migration between Symbol Technologies mobile computers
- Compatible with Visual Basic, C++, and other Windows-based products

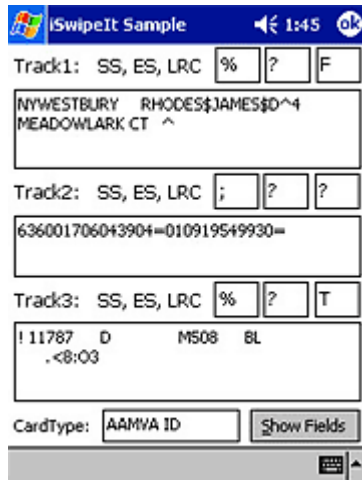

iSwipeIt is a stand-alone control. Developers can integrate MSRs into Visual Basic applications with minimal effort, setting up control properties at design time. **iSwipeIt** Control functions include, but are not limited to:

- Decoding swiped data
- Generating swipe events

Standard and Deluxe Versions

iSwipeIt Lite™ (standard version) supports credit cards and ID cards (see sample above).

iSwipeIt Deluxe™ supports DMV and AAMVA data formats.
